Contents Volume 108, 1994

Fluvial response to Late Quaternary climatic and environmental change, Edwards Plateau, Texas
M. D. Blum, R. S. Toomey III, and S. Valastro Jr 1
Paleogeographic and paleotectonic implications of clay mineral distribution in late Jurassic–early Cretaceous sediments of the Pindos-Olonos and Beotian Basins, Greece
F. Thiébault, J. J. Fleury, B. Clément and J. M. Dégardin 23
Stable isotopic evidence from paleosol carbonates and fossil teeth in Greece for forest or woodlands over the past 11 Ma
J. Quade, N. Solounias and T. E. Cerling 41
Taphonomic processes in modern freshwater molluscan death assemblages: Implications for the freshwater fossil record
R. H. Cummins 55
Evolution of the Norwegian Current and the Scandinavian Ice Sheets during the past 2.6 m.y.: evidence from ODP Leg 104 biogenic carbonate and terrigenous records
R. Henrich and K.-H. Baumann 75
Strontium isotope stratigraphy for Late Cretaceous time: Direct numerical calibration of the Sr isotope curve based on the US Western Interior
J. M. McArthur, W. J. Kennedy, M. Chen, M. F. Thirlwall and A. S. Gale 95
Trace fossils from interdune deposits—an example from the Lower Triassic aeolian Tumlin Sandstone, central Poland
R. Gradziński and A. Uchman 121
An early Miocene Atlantic-wide foraminiferal/palaeoceanographic event
C. W. Smart and J. W. Murray 139
Ages and paleoenvironment of Miocene mammalian faunas from Thailand
S. Ducrocq, Y. Chaimanee, V. Suteethorn and J.-J. Jaeger 149
Geochemical study of organic-matter rich cycles from the Kimmeridge Clay Formation of Yorkshire (UK): productivity versus anoxia
N.-P. Tribovillard, A. Desprairies, E. Lallier-Vergès, P. Bertrand, N. Moureau, A. Ramdani and L. Ramanampisoa 165
A carbon isotope record of the upper Chinese loess sequence: Estimates of plant types during stadials and interstadials
L. A. Frakes and S. Jianzhong 183
Preface
T. M. Cronin, J. A. Wolfe and K. Ogasawara 193
Tertiary climatic changes at middle latitudes of western North America
J. A. Wolfe 195
An analysis of Neogene climates in Beringia
J. A. Wolfe 207
Climatic comparison of Miocene pollen floras from northern East-China and south-central Alaska, USA
G. Liu and E. B. Leopold 217
Late Cenozoic vegetational and climatic changes in Kyushu, Japan
A. Iwauchi 229
Floral and paleoenvironmental history from the late Pliocene to middle Pleistocene in and around central Japan
A. Momohara 281
History of the Paleogene molluscan fauna of Japan: a paleobiogeographic approach
Y. Honda 295
Cenozoic paleogeography and climatic changes in the North Pacific Ocean
Y. B. Gladenkov 311
Cenozoic history of Turritelloidea and Buccinoidea (Mollusca: Gastropoda) in the North Pacific
L. V. Titova 319
Neogene paleogeography and marine climate of the Japanese Islands based on shallow-marine molluscs
K. Ogasawara 335
Post-Miocene cold-water molluscan faunas from Hokkaido, Northern Japan
A. Suzuki and M. Akamatsu 353
An attempt to estimate the surface temperature of the Japan Sea in the Early Pleistocene by using a molluscan assemblage
K. Amano 369
Sea surface temperature history of the low latitude western Pacific during the last 5.3 million years
L. Wang 379

Late Pliocene climate change 3.4–2.3 Ma: paleoceanographic record from the Yabuta Formation, Sea of Japan
T. M. Cronin, A. Kitamura, N. Ikeya, M. Watanabe and T. Kamiya 437
Early Pleistocene birth of the Okinawa Trough and Ryukyu Island Arc at the northwestern margin of the Pacific: evidence from Late Cenozoic planktonic foraminiferal zonation
H. Ujiié 457
Spectral analysis of the diatom paleotemperature records at DSDP Sites 579 and 580 near the subartic front in the western North Pacific
I. Koizumi 475
Paleoceanographic evolution of the Japan Sea
R. Tada 487
Quaternary organic carbon cycles in the Japan Sea (ODP-Site 798) and their paleoceanographic implications
R. Stax and R. Stein 509
Late Cenozoic records of eolian quartz flux in the Sea of Japan (ODP Leg 128, Sites 798 and 799) and paleoclimate in Asia
M. Dersch and R. Stein 523
The middle Miocene climatic transition: East Antarctic ice sheet development, deep ocean circulation and global carbon cycling
B. P. Flower and J. P. Kennett 537
